*Publications*

How to rewire the host cell: A home improvement guide for intracellular bacteria [1]
Cornejo E, Schlaermann P, Mukherjee, S.

Innate immunity kinase TAK1 phosphorylates Rab1 on a hotspot for posttranslational modifications by host and pathogen [2]
Levin RS, Hertz NT, Burlingame AL, Shokat KM*, Mukherjee, S*.
* Co-corresponding author

Legionella suppresses the host unfolded protein response via multiple mechanisms. [3]
Treacy-Abarca S & Mukherjee S.

Legionella pneumophila subversion of host vesicular transport by SidC effector proteins. [4]
Horenkamp FA*, Mukherjee S*, Alix E*, Schauder CM, Hubber AM, Roy CR, Reinisch KM.
* Equal Contribution

Structure of the Legionella effector AnkX reveals the mechanism of phosphocholine transfer by the FIC domain. [5]
Campanacci V, Mukherjee S, Roy CR, Cherfils J.
EMBO J. 2013 May 15;32(10):1469-77. doi: 10.1038/emboj.2013.82.
Subversion of membrane transport pathways by vacuolar pathogens. [6]
Alix E*, Mukherjee S*, Roy CR.

* Equal Contribution

Modulation of Rab GTPase function by a protein phosphocholine transferase. [7]
Mukherjee S*, Liu X*, Arasaki K, McDonough J, Galán JE, Roy CR.

* Equal Contribution

The Golgi protein p115 associates with gamma-tubulin and plays a role in Golgi structure and mitosis progression. [8]
Radulescu AE*, Mukherjee S*, Shields D.

* Equal Contribution

Opposing action of casein kinase 1 and calcineurin in nucleo-cytoplasmic shuttling of mammalian translation initiation factor eIF6. [9]
Biswa A, Mukherjee S, Das S, Shields D, Chow CW, Maitra U.
Bacterial FIC Proteins AMP Up Infection. [10]
Roy CR, Mukherjee S.

Mukherjee S, Shields D.

Fragmentation of the Golgi apparatus: an early apoptotic event independent of the cytoskeleton. [12]
Mukherjee S, Chiu R, Leung SM, Shields D.

Sengupta R, Sahoo R, Mukherjee S, Regulski M, Tully T, Stuehr DJ, Ghosh S.
A caspase cleavage fragment of p115 induces fragmentation of the Golgi apparatus and apoptosis. [14]

Chiu R, Novikov L, Mukherjee S, Shields D.
